

The Toolkit

The LSN is initiating a cyber security toolkit that will provide the members with security awareness training, tips and tricks and monthly tid-bits on key cybersecurity trends for the protection of information.

LIMIT LOGIN ATTEMPTS

Locking out accounts after a number of failed attempts helps protect unauthorized users.

November Security Tip

Login Security is an access control that prevents unauthorized access to accounts and data. This is a top concern when working remotely.

Login Security involves using various methods of multi-factor authentication (MFA) to verify the identities of users.

Building off the last tid-bit, **Login Security** involves more than just a strong password protection policy.

MULTI-FACTOR AUTHENTICATION

Require users to provide more than one additional piece of information to verify their identity which could include facial recognition, voice recognition or fingerprint scanning

LIMIT SESSION LENGTH

Set thresholds for active sessions and the requirement to reenter passwords and verification via MFA.

PASSWORD RESET

Reducing the ability to reuse passwords when resetting them.

Please note that the Law Society of Nunavut is the governing body of legal profession in Nunavut and does not provide legal services or advice to the public.
